

Sai Venkata Sahith Reddy Kadapaiahgari

Data Engineer

Koblenz, Germany | +49 17634609021 | sahith.kadapaiahgari2106@gmail.com | @linkedin | @github

PROFESSIONAL SUMMARY

Data Engineer with over 3 years of experience building and scaling cloud data platforms across AWS and Azure. Specialized in designing efficient **ETL/ELT** pipelines, data lakes, and high performance data warehouses using **Python, SQL, Spark**, and **Databricks**. Proven track record of processing terabyte scale daily data and automating workflows to deliver clean, reliable production data pipelines.

PROFESSIONAL EXPERIENCE

- Working Student Data & Analytics Engineer** | Qualifyze | Frankfurt, Germany September 2023 – June 2025
- Collaborated with the team to build ELT pipelines using **dbt** and **SQL** to transform multi source data in **Amazon Redshift**, accelerating data delivery speeds by 15%.
 - Redesigned database schemas and **optimized** complex SQL queries, improving overall data quality and boosting query performance by 35%.
 - Partnered with data scientists to build production ready **Python pipelines** for machine learning models, saving the team 10 hours of manual data preparation per week.
 - Managed code deployments and version control using GitHub workflows, improving project delivery speeds by 10% across the engineering team.
- Data & Analytics Engineer** | Tata Consultancy Services | Hyderabad, India September 2020 – July 2022
- Engineered data pipelines on **Azure Data Factory** to process over 1TB of daily data, reducing latency by 20% through automated troubleshooting and bottleneck optimization.
 - Developed and optimized **PySpark jobs** to process heavy data workloads, improving cluster efficiency and cutting data transformation runtimes by 30%.
 - Designed scalable **star and snowflake schemas** and optimized SQL procedures, boosting query speeds by 35% while lowering cloud infrastructure costs.
 - Transitioned full load pipelines to incremental loading strategies, cutting system resource overhead and reducing daily processing runtimes by over 2 hours.
 - Built automated **data quality** frameworks and monitoring alerts across relational, NoSQL, and Hadoop systems, reducing data incidents by 25%.
 - Partnered with cross functional teams to build and validate secure pipelines that delivered financial and regulatory data to over 200 production users.
 - Automated deployment workflows using **CI/CD** pipelines, saving over 40 hours of manual engineering effort every month.

EDUCATION

- | | | |
|----------------------------|---|---------------------------|
| University of Koblenz | MS in Web and Data Science Germany | October 2022 – March 2026 |
| RGM College of Engineering | BS in Computer Science and Engineering India | June 2016 – March 2020 |

CREDENTIALS

- | | |
|--|-----------|
| Microsoft Certified Fabric Data Engineer Associate Microsoft [Credential] | June 2025 |
| Data Engineer Associate DataCamp [Credential] | June 2025 |
| Creating Dashboards and Storytelling with Tableau Coursera [Credential] | May 2023 |

PROJECTS

- Real-Time Stock Market Data Pipeline** | Apache Kafka, AWS. [GitHub] January 2026
- Built a real-time streaming pipeline using Apache Kafka to ingest stock market data into an Amazon S3 data lake. Automated data cataloging with AWS Glue and structured the data to enable fast SQL queries through Amazon Athena, creating a highly scalable and fault-tolerant event-driven architecture.
- Azure Odyssey: End-to-End Data Flow** | ETL, Data Factory, Databricks, Synapse, PySpark. [GitHub] June 2025
- Engineered an ELT platform by integrating Azure Data Factory, Databricks, and Synapse Analytics. Implemented a Medallion Architecture (Bronze/Silver/Gold) using PySpark to clean raw data, optimizing Spark jobs to cut overall processing runtimes by 25%.

TECHNICAL SKILLS

Core Languages : SQL, Python, PySpark
Data Processing & ETL : dbt, Apache Spark, Apache Airflow, Apache Kafka
Databases & Warehouses : Snowflake, Databricks, Amazon Redshift, Google BigQuery, PostgreSQL
Cloud Platforms : AWS (Glue, Lambda), Azure (Microsoft Fabric), Google Cloud Platform (GCP)
DevOps & Infrastructure : Git/GitHub, CI/CD, Terraform, Docker
Languages : English(C1), German(B1)
